PROFESSIONAL EXPERIENCE

GLOBALLOGIC TECHNOLOGIES PVT LTD

Working as a Analyst from July 2016 – Jan 2019 in client Google, Hyderabad. Associated in the projects mentioned below:

PROJECTS EXECUTED

Project 1 TWIGS- Telecom wire & pole identification of google services

Description: TWIGS is Telephone pole & Wire Identification as a Google Service. The purpose of a TWIGS project is to create a Google-hosted pole database available internally and eventually to 3rd parties. A network of poles which can be later utilised to understand whether the region can have internet & TV connectivity. Basis available resources, the operator has to identify valid poles available in the given region of interest and then process the transaction.

Project 2 ADDRESSING

Description: Address defines house number, road number, street name, city name. Source is given we will give addresses from source point to destination point based on the policies.

Project 3 Human sensing (for driverless car)

Description: Effectively trained the algorithm to identify the human structures and their movement along with other features which sense the obstructions while driving on road.

Project 4 R/MI

Description: R/MI is a Research and Machine Intelligence as a Google Service. The purpose of the R/MI project is to understand the patterns of huge volumes i.e., photos/audios/videos that are available in the master database in turn create algorithms to provide the best suggestions and results to the users.
